

Servicing the Folding Carton Market

Independent Corrugator Inc. (ICI) has a full range of corrugated products and services to offer to the Folding Carton industry. Overlap and diversify your core business with new packaging solutions and increased structural integrity.

Our unique manufacturing process, coupled with our extensive market expertise, enables us to introduce your company to corrugated products to enhance your "bottom line".

Direct Print Litho

ICI manufactures micro flute corrugated sheets with superb graphic substrates. This combination provides a flat and smooth corrugating surface, which is mechanically structured to be processed through the in-feed and printing stations on YOUR litho offset printing equipment. This same sheet is then easily converted on your die cutting, as well as your folding and gluing equipment.

Suggested board construction: Micro Flutes + High Hold Out SBS (offset print liner)

ICI is your specialty graphic corrugated supplier for direct print litho offset.

I-COAT™

Introduce your new products with our premier I-COAT™ off line, roll-to-roll coating system. Whether we coat YOUR material or we coat our linerboard, I-COAT™ adds a new dimension for packaging appeal and performance.

Color Coatings

- ▶ Color match Pantone (PMS) colors
- ▶ Color match your customer's custom color
- ▶ Add a top coat high gloss varnish

Bold, bright and uniform application to expand your color choices!

Functional Coatings

- ▶ Water Resistance and Moisture Barriers
- ▶ Grease and Oil Resistant Coatings
- ▶ Abrasive Resistant Coatings
- ▶ Static Dissipative and Conductive Coatings

More than just a corrugator!
